

## COVID-19 Alert

Dear Patients:

Our first concern is and always has been your health and well being. We have always followed the highest standards of infection control for your safety and the safety of our staff.

The PA Department of Health has reversed their previous decision to close all dental offices in the state. We are now permitted to see dental emergency patients who are asymptomatic and not suspected or confirmed to have COVID-19. If you have any symptoms which include a fever, cough, muscle pain or shortness of breath we CANNOT see you. You will need to contact your primary care physician and follow his/her instructions.

During this difficult time we will remain available to discuss and advise you regarding your oral health. Please call our office at 814-231-0110.

Dr Barry Holden & Staff
